
$\{f > c\}$
$H: \ f(x) = c$
f
$x_0 = \delta_{\text{bound}} \in F$
Ω
$\delta \in \operatorname{int} \Omega$
$F = \Omega \cap H$
$\{f \leq c\}$

$$\Omega \subseteq \{f \leq c\}, \qquad F = \Omega \cap H \ni \delta_{\text{bound}}, \qquad s \in R(F)$$

$f < c$ on $\operatorname{int}\Omega$ lifts to $f \leq c$ on Ω, $f(\delta_{\text{bound}}) = c$
